

ROTARY NOZZLE RETROFIT REBATE

This rebate specifically targets the replacement of less efficient, traditional fixed or adjustable arc spray nozzles, with more efficient rotary nozzles. In most cases, the retrofit can be accomplished by simply removing the old spray nozzle and replacing with the new rotary nozzle. Generally, replacement of the entire sprinkler head is not necessary. These water conserving nozzles are recommended in conjunction with a 6-inch pop-up height sprinkler head for turf areas, and a 12-inch pop-up height for native areas.
